### Significance of Scenario Based Learning Technique to Enhance the Reading skill

#### Abstract

The research paper is about to enhance reading skill through Scenario Based Learning. To gain employability skills in the market driven society an associate language is necessary to survive in the present era. According to Krishnaswamy's view teaching English in based on "The Market-Driven utilitarian function. One of the main important skill to seek employability is communication skills. It can be verbal communication or through mail. Corporate companies' communication takes place through the mail conversation. So the employee must able to read and understand the language used for communication. To improve the receptive skills make the circumstances livelier and thought-provoking session. If the learners want to develop the receptive skill easily, the situation must create the pictorial

imaginative scene in the process of listening and reading activity. Scenario Based Learning is an emerging technique which helps to enhance the reading skill.

Key Words: Reading skill, Scenario Based Learning, Student Centric Style, Problem Based Learning, Case Based Learning.

### Prominence of English

English is the communal language in The United Kingdom and The United States of America. Hence, English is known as the international language. People learn English as native language, second language and foreign language all over the world. In the contemporary era English is used to gain scientific knowledge, modernization and development. People learn English to seek job opportunities.

### Reading Skill

Reading skill is the learning skill of the major English skills. The reading proficiency develops the understanding of language, grammatical structure and to gain more vocabulary of language. It helps the learners to make sense through reading any printed materials. Reading skill enriches the thinking skill. The reading method can differ based on the interest among the readers. The people read out of passion, love towards the books, to get information and to get pleasure. If the person wants to read something, they should know the pattern of the words, pronunciation and the meaning of words.

### Scenario Based Learning

Scenario Based Learning (SBL) is one of the active learning strategies to learn skill through interactive scenarios. SBL uses two interactive scenarios for learning.

- Problem Based Learning
- Case Based Learning

SBL helps to apply the subject knowledge, critical thinking and enhance problem Solving skill. SBL Portraits the real world context for the learning. SBL is the exploration of realistic task and helps students to face the challenges. The scenario's which can be either complete or incomplete. If it an incomplete task the students have to fill the gaps and complete the task.SBL is based on Strategic, Self-Regulation Model (S2R). SBL give paths to learn real world skills and experience.

### Scenario Based Learning

Figure 1.1

The theory of Scenario Based Learning based on Situated Learning Theory was founded by Lave and Wenger (1991). This SBL can used scenarios like decision making, critical thinking of any situation.

#### Scenario Based Learning-Advantages

- ✓ SBL concentrated fully on Student Centric Style
- ✓ SBL Arouses the critical thinking of the learners
- ✓ SBL are in the form of story
- ✓ SBL engages the learners emotion
- ✓ SBL stimulate real world practices
- ✓ Non-linear or Linear routine pattern are used

- ✓ SBL speed up the learners time
- ✓ SBL trigger the learners memory
- ✓

#### Studies related to Scenario Based Learning

Kathryn McCarthy et.al (2018) had investigated about comprehend level access through background on based on science texts. The study carried out based on Scenario Based Assessment.

John Sabatini et.al (2014) had used Scenario Based Learning Assessment style for the students faced reading behavior struggles. The learners used SBL Method were able to understand the text and able to solve the problems in complex situation. The authors also found that SBL techniques are increasing the level of reading skill among the struggled readers.

Alexis Battista (2001) made an analysis on how scenario based simulation supported for learning activity. Alexis stated that during SBL stimulation the learners were actively participated. Alexis also examined student's activity types, pattern analysis of activity. Based on SBL stimulation method the author had framed instructional design and assessment.

Meral Seker (2016) investigated about the Scenario Based Instruction worked as a tool to encourage Self-Regulated strategy. At the end of Meral study, the learners were got high language experience. Meral suggested that, for the development of self-regulated learning skill the Scenario Based Learning technique are very useful.

Stephanie Ivec (2014) had gathered branching Techniques of SBL from Clark Aldrich. The branching techniques are used for effective e-learning classroom. These techniques are useful to show the learners about the consequences of learning.

The branching techniques SBL:

- SBL Structure create the narrative feel

- SBL must consists of action, direct quotes and Intention
- SBL should not give more consequences to the readers
- The background information can used in between the characters dialogue
- Use credible characters to create reactions
- Give more information about character not to the back stories
- Make split in between the passages
- Make some available action
- Learners be the coach
- Show learners to face consequences

English is considered very important to the recruiters at the time of recruitment. The job market wants people who can effectively make formal language skills. The recruiter wants the employee to be more critical thinker with problem solving skills. The Scenario Based Learning Technique will help the learner to face the real life problems. Communication can takes place in speech and written form. The employee must be a good presenter, negotiator and convener of meeting. The value of English language in the job market cannot be undermined. The English language skills can provide the opportunities for self-employment too.
